## ABOUT AFFINITY IT

Affinity IT Security Services is a New Jersey-based certified small business that has been helping clients improve their security posture and minimize their cyber threat exposure for more than a decade. We always seek to recommend practical and cost-effective solutions that truly improve your cybersecurity across the enterprise.

## CORE COMPETENCIES

- Network Penetration Testing
- Application Security Testing
- Cybersecurity Risk Assessments
- Secure Application Development
- Cybersecurity Awareness Training
- Information Security Policy Consulting
- Anti-Phishing Campaigns
- Regulatory Compliance

## PAST PERFORMANCE

Our company provides the best value for our clients at a reasonable pricing. This value proposition along with excellent service and flexibility are our main strengths. Affinity IT has deep expertise and has an agile company structure that allows us to perform high-quality work at a significantly low overhead cost. This fact, in conjunction with our standard marketing practices, has proven to be a winning combination.

## FEATURED CLIENTS

- Bank of America
- Goldman Sachs
- BNP Paribas
- CME Group
- EmblemHealth
- Chubb Insurance
- Nuance Communications

## DIFFERENTIATORS

As a certified small business, our size allows us to be flexible to the needs of our clients. Our project teams are agile and can quickly integrate urgent or unexpected requirements into their next iteration of deliverables while still maintaining high-quality standards. For example, during the ongoing pandemic, we have been able to continue relatively unaffected as much of our work was easily adapted to run remotely.

Our team has strong communications skills which are essential for planning meetings, facilitating interviews, and delivering effective presentations. We work collaboratively with a diverse staff at different levels of seniority by clearly documenting and explaining findings, relevant factors, severities, priorities, and remediations.

Affinity IT has been in this business space for decades and has a wide network of vetted subject matter experts who can be subcontracted to supplement our team when necessary.
